WFN SOLAR, LLC AND RADIANCE SOLAR, LLC ANNOUNCE STRATEGIC PARTNERSHIP

Marietta, Georgia (May 8, 2013) – WFN Solar, LLC, an emerging alternative energy management firm for local governments and Radiance Solar, LLC, a leading solar contractor specializing in design, installation, and maintenance of solar energy systems, announces a strategic partnership to provide local municipalities with solar system leasing opportunities, creating fixed, long-term, reduced-kilowatt rates.

The WFN Solar business model focuses on public-private partnerships to provide substantial savings to the nonprofit and public sectors by utilizing roof-mounted solar systems for increased energy efficiency and savings. The model combines the benefits of affordable costs of solar installations with federal, state, Renewable Energy, and New Market tax credits. Municipal projects managed under the partnership will include comprehensive oversight of all aspects of each project to include planning, design, construction oversight, and tax credit loan management.

“The development of WFN Solar was a natural evolution for the WFN brand as our expertise with private-public partnerships grows,” said Nick Autorina, President of WFN Solar, LLC. “The collaboration between WFN and Radiance will create an enduring synergy for our clients and help these municipal governments realize significant savings over time.”

A well-designed leased solar project often results in a 15 percent or more reduction in electricity costs. Over the standard, 20-year lease period, the municipalities would be unaffected by rising utility rates, which, on average are raised three to six percent annually.

About WFN Solar:

Based in Marietta, Georgia, WFN Solar is new venture of the WFN brand family. As full-time, expert federal grant administrators for large municipalities in the metropolitan Atlanta area for more than 30 years, WFN has delivered expert program management, training, and technical assistance to municipal and county leaders, including oversight of community development and energy grant portfolios. WFN Solar manages all aspects of project planning, development, financing, and installation for Solar Photovoltaic (PV) projects, and provides a turnkey solar system at no upfront costs to the participating local government.

About Radiance Solar:

Based in Atlanta, Georgia, Radiance Solar is a leading solar contractor, specializing in the design, installation and maintenance of solar energy systems. Their mission is to bring low-cost, reliable solar energy within reach of every electricity user through a relentless commitment to innovative design, aggressive procurement and efficient construction techniques.
